01

Company history

Take a look back at our company's history, dating back to the 1990s.

The revolutionary events in 1989, followed by the fall of the Iron Curtain, allowed for business to develop.

At this time, company founder Rostislav Hanyš had a clear picture of his future in mind.

The purchase of his first crane marked the beginnings of the company, which is today the largest provider of cranes in the Czech Republic.

1991

Rostislav Hanyš set up the company which bears his name in 1991, beginning to operate his first mobile crane in the 1990s.

In its early years, the company's main line of business was crane work. With growing demand and customer favour, not only did he increase the number of cranes he had, but also their lifting capacity. As a result, the company's business breadth progressively expanded to include heavy transport, which we've been focused on since 2002. We can now provide more comprehensive services for our customers.

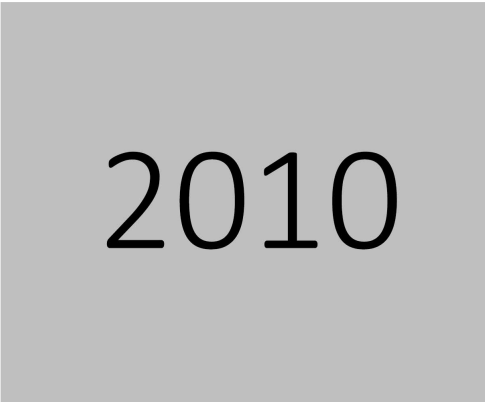

2002

2005

In 2005, Rostislav Hanyš set up the company known as Hanyš – Jeřábnické práce, s.r.o. This company provides crane operation and heavy transport services to the present day.

In 2010, a new company headquarters was constructed at Radonice, Prague-East. This new complex includes an administration building, accommodation, our own service centre and 65,000 m² of storage space. This represented our seventh branch in Czechia.

2010

2019

In 2019, the company turned its focus to expanding its vehicle fleet and building new branches. From 2019 to 2023, 19 new branches were established across the Czech Republic, allowing us to offer our customers more flexible services.

Today's modern and dynamically growing period brings ever new challenges and opportunities. Today and in future years, we'll keep up our focus on ensuring maximum customer satisfaction. Our company is continuing to set the trend of increasing the quality of services provided, requiring regular equipment replacement and progressive capacity increases.
